fitness-studio-class-web

Design 20261006-boutique-fitness-studio-class-b497 · version 1

Approved	by Hamza (via web) on 2026-10-06
Design sha	`992a53b84b2214af4e35428e944f5b94cc0739c2250f7893e3c1d74ef35ed295`
Screens	3: S-1, S-2, S-3
Flow	Alex lands on Schedule at the root URL, picks a day on the week strip, narrows by type, intensity or time of day, and books or joins a waitlist straight from a class card. Tapping a card anywhere except its button opens Class Detail. On phones this is a full page with a pinned action footer. From 1024 px it opens as a side panel next to the schedule, and Back returns to the same day, week and filters. The AR avatar in the top bar opens My Bookings, which shows stats and Upcoming and Past tabs. Each row opens Class Detail, and its quick Cancel or Leave action uses the same confirmation dialog.

The product and its look

Who uses it	Members of one boutique fitness studio, here Alex Rivera on an Unlimited Monthly plan, booking their own classes
Where	Quick visits several times a week, mostly on a phone between work and the studio, sometimes on a laptop to plan the week
Device	both
Tone	energetic, warm, confident
What matters most	Tapping Book on a class with 'Only 2 left' and seeing 'You're booked' with Undo
Traits	colour-coded class types, scarcity and waitlist, weekly streak, two-hour cancel rule

Drawn from

- **Booking.com**: Scarcity labels next to capacity ('Only 2 left'), and a deep blue for the one primary action
- **Airbnb**: Warm white page, round corners and charcoal text, with colour kept to one action plus the class-type tags
- **Expedia**: A deep navy ink as the brand, so the five type accents stay the loudest colour
- **Hyatt**: Generous white space and a calm, editorial plain top bar with the wordmark

Type, corners and spacing

Body font	"Inter Tight","Helvetica Neue",Helvetica,"Nimbus Sans","Liberation Sans",Arial,sans-serif
Heading font	"Barlow Condensed","Avenir Next Condensed","DIN Condensed","Bahnschrift SemiCondensed","Roboto Condensed","Arial Narrow",sans-serif (650)
Corners	18 px

Schedule

Requirements

- **REQ-1** The booking app shall be a responsive web app for the single-location boutique studio Pulse Studio offering Yoga, Pilates, HIIT, Spin and Boxing classes, presenting exactly three screens, Schedule (the home screen at the root URL), Class Detail and My Bookings, for the single pre-signed-in member Alex Rivera with no sign-in screen, under a top bar that shows the "Pulse Studio" wordmark and the member avatar with initials "AR" linking to My Bookings.
- **REQ-2** The booking app shall work out "today", day boundaries and every time-based rule in the Europe/London timezone and show all times in 24-hour HH:mm format.
- **REQ-3** When the seed generator runs, the booking service shall return seed data containing at least 40 class sessions across the types Yoga, Pilates, HIIT, Spin and Boxing and the rooms Studio A, Studio B and Spin Room, 5 instructors with name, bio and avatar, at least 3 full sessions, at least 3 sessions with 1–3 spots left, at least 1 session with status "Cancelled by studio", and for demo member Alex Rivera 2 upcoming Booked bookings, 1 Waitlisted booking and 3 past Attended bookings, none of them on a studio-cancelled session.
- **REQ-6** When Alex books a Scheduled session that has free spots, starts within the booking window, does not overlap another Booked session of Alex's and keeps Alex at or under 10 upcoming Booked sessions, the booking service shall create one Booked record with an ID and created date-time and increase the session's booked count by 1.
- **REQ-7** If Alex already holds a Booked or Waitlisted record for a session, then the booking service shall reject a further book or join-waitlist request for that session with an "already booked" error without creating a record or changing counts.
- **REQ-8** If a session's booked count equals its capacity, then the booking service shall reject a book request with a "class full" error and leave the booked and waitlist counts unchanged.
- **REQ-9** When Alex requests to join the waitlist of a Scheduled session that starts within the booking window, the booking service shall either create a Waitlisted record whose position equals the previous waitlist count plus 1 and increase the waitlist count by 1, without checking the overlap rule or the 10-booking limit, when the session is full, or reject the request with a not-full error when the session has free spots.
- **REQ-10** If a session starts more than 7×24 hours after now, then the booking service shall reject book and join-waitlist requests with an "outside booking window" error, while a session starting exactly 168 hours after now is bookable.
- **REQ-11** If a session that has not started starts less than 15 minutes after now, then the booking service shall reject book and join-waitlist requests with the "outside booking window" error, while a session starting exactly 15 minutes after now is bookable.
- **REQ-13** If a session's start time is at or before now, then the booking service shall reject book, join-waitlist, cancel and leave-waitlist requests for it with a "class has started" error and leave all bookings and counts unchanged.
- **REQ-14** If a session has status "Cancelled by studio", then the booking service shall reject book and join-waitlist requests for it with a "cancelled by studio" error.
- **REQ-15** If a book request would give Alex two Booked sessions whose time ranges overlap, then the booking service shall reject it with the error message "You're already booked for <class name> at <start>–<end>.", while sessions that only touch end-to-start are not treated as overlapping.

- **REQ-16** If Alex already holds 10 Booked records on sessions that have not started, then the booking service shall reject a further book request with the error "You've reached the limit of 10 upcoming classes.", where Waitlisted records do not count toward the limit.
- **REQ-24** When the app opens after Alex was promoted from a waitlist to Booked since the last visit, the booking app shall show a toast naming the class Alex is now booked for, once.
- **REQ-25** When Alex undoes a booking from the booking toast within 5 seconds, the booking service shall delete the Booked record as if it was never made, without creating a Cancelled record or late flag, and restore the session's booked count to its value before the booking.
- **REQ-31** When the action state for a session is requested, the booking service shall return one of Book (with spots left), Join waitlist (with the position Alex would get), Booked, Waitlisted (with position and any stored skip reason, whenever Alex holds a Waitlisted record, even if the session has free spots), or Disabled with a reason text for started, past, studio-cancelled or outside-booking-window sessions.
- **REQ-32** When a session's availability label is requested, the booking app shall return "Cancelled" for a studio-cancelled session, "Full · N on waitlist" for a full session, "1 spot left" for one free spot, "Only N left" for 2–3 free spots, and "N spots left" for 4 or more free spots.
- **REQ-33** The Schedule screen shall display on each class card the availability label defined by REQ-32, so one free spot reads "1 spot left" and 2–3 free spots read "Only N left".
- **REQ-34** When schedule filters are applied, the booking service shall return the selected day's sessions, including sessions Cancelled by studio, ordered by start time, that match any selected class type, any selected intensity and any selected time of day (Morning before 12:00, Afternoon 12:00–16:59, Evening 17:00 onward), where an empty filter group matches everything.
- **REQ-35** The Schedule screen shall show a Monday–Sunday day strip of 7 chips labelled like "Mon 12", with today highlighted, days without sessions dimmed, and previous/next week arrows limited to the current and next week.
- **REQ-36** The Schedule screen shall show a filter bar with multi-select class type chips in each type's accent colour, Low/Medium/High intensity chips, Morning/Afternoon/Evening chips and a "Clear filters" action that resets all filters.
- **REQ-37** The Schedule screen shall show each session of the selected day as a card displaying start time and duration, class name, colour-coded type tag with text, intensity indicator, instructor avatar and name, room, capacity bar with availability label, and an action button, with studio-cancelled sessions shown struck through.
- **REQ-38** The Schedule screen shall label each card's action button "Book", "Join waitlist", "Booked ✓" or "Waitlisted #N" according to Alex's state, or show it disabled when the session has started, is cancelled by the studio, or is outside the booking window.
- **REQ-39** When Alex activates a Schedule class card outside its action button or a My Bookings row, the booking app shall open the Class Detail screen for that session.
- **REQ-40** When Alex books from a Schedule card, the booking app shall update the card at once and show the toast "You're booked for <class name> · <Ddd> <HH:mm>" with an Undo action available for 5 seconds.
- **REQ-41** When Alex joins a waitlist, leaves a waitlist or cancels a booking, the booking app shall show a confirmation toast without an Undo action.
- **REQ-42** If a book, cancel, join-waitlist or leave-waitlist call started from an optimistic screen update is rejected or fails, then the booking app shall restore the screen to its previous state and show an error toast with a plain-language message and no raw error text or stack trace.

- **REQ-43** While schedule data is loading, empty, filtered to nothing, or failed to load, the Schedule screen shall show skeleton cards, "No classes on this day" with an icon, "No classes match your filters" with Clear filters, or an inline error message with Retry, respectively.
- **REQ-51** The booking app shall define its colours as design tokens with a warm off-white background, near-black text, one brand primary for primary actions, semantic success, warning, danger and muted colours, and accents Yoga sage green, Pilates dusty rose, HIIT coral/orange, Spin electric blue and Boxing deep plum used on tags, card edges and the detail hero.
- **REQ-52** Where the system colour preference is dark, the booking app shall render all three screens in a dark theme.
- **REQ-53** The booking app shall use one display font for headings and class names, one sans-serif body font, a type scale with display, h1, h2, body and caption sizes, and tabular figures for times and numbers.
- **REQ-54** While the system prefers reduced motion, the booking app shall replace card press, panel slide, capacity bar fill and toast slide animations with instant changes.
- **REQ-55** The booking app shall make every interactive element reachable and operable by keyboard alone with a visible focus indicator.
- **REQ-56** The booking app shall use semantic headings, landmarks and labels, announce the capacity bar as "N of M spots left", and pair every colour signal (type tags, status badges) with text or an icon.
- **REQ-58** The booking app shall render all three screens without horizontal page scrolling from 360 px wide (only the day strip may scroll), show schedule cards in 2 columns from 768 px to 1023 px, and from 1024 px show Class Detail as a side panel beside the schedule within a maximum content width.
- **REQ-59** The booking app shall make every interactive target at least 44 × 44 px.

Requirements

- **REQ-1** The booking app shall be a responsive web app for the single-location boutique studio Pulse Studio offering Yoga, Pilates, HIIT, Spin and Boxing classes, presenting exactly three screens, Schedule (the home screen at the root URL), Class Detail and My Bookings, for the single pre-signed-in member Alex Rivera with no sign-in screen, under a top bar that shows the "Pulse Studio" wordmark and the member avatar with initials "AR" linking to My Bookings.
- **REQ-2** The booking app shall work out "today", day boundaries and every time-based rule in the Europe/London timezone and show all times in 24-hour HH:mm format.
- **REQ-3** When the seed generator runs, the booking service shall return seed data containing at least 40 class sessions across the types Yoga, Pilates, HIIT, Spin and Boxing and the rooms Studio A, Studio B and Spin Room, 5 instructors with name, bio and avatar, at least 3 full sessions, at least 3 sessions with 1–3 spots left, at least 1 session with status "Cancelled by studio", and for demo member Alex Rivera 2 upcoming Booked bookings, 1 Waitlisted booking and 3 past Attended bookings, none of them on a studio-cancelled session.
- **REQ-6** When Alex books a Scheduled session that has free spots, starts within the booking window, does not overlap another Booked session of Alex's and keeps Alex at or under 10 upcoming Booked sessions, the booking service shall create one Booked record with an ID and created date-time and increase the session's booked count by 1.
- **REQ-7** If Alex already holds a Booked or Waitlisted record for a session, then the booking service shall reject a further book or join-waitlist request for that session with an "already booked" error without creating a record or changing counts.
- **REQ-8** If a session's booked count equals its capacity, then the booking service shall reject a book request with a "class full" error and leave the booked and waitlist counts unchanged.
- **REQ-9** When Alex requests to join the waitlist of a Scheduled session that starts within the booking window, the booking service shall either create a Waitlisted record whose position equals the previous waitlist count plus 1 and increase the waitlist count by 1, without checking the overlap rule or the 10-booking limit, when the session is full, or reject the request with a not-full error when the session has free spots.
- **REQ-10** If a session starts more than 7×24 hours after now, then the booking service shall reject book and join-waitlist requests with an "outside booking window" error, while a session starting exactly 168 hours after now is bookable.
- **REQ-11** If a session that has not started starts less than 15 minutes after now, then the booking service shall reject book and join-waitlist requests with the "outside booking window" error, while a session starting exactly 15 minutes after now is bookable.
- **REQ-13** If a session's start time is at or before now, then the booking service shall reject book, join-waitlist, cancel and leave-waitlist requests for it with a "class has started" error and leave all bookings and counts unchanged.
- **REQ-14** If a session has status "Cancelled by studio", then the booking service shall reject book and join-waitlist requests for it with a "cancelled by studio" error.
- **REQ-15** If a book request would give Alex two Booked sessions whose time ranges overlap, then the booking service shall reject it with the error message "You're already booked for <class name> at <start>–<end>.", while sessions that only touch end-to-start are not treated as overlapping.

- **REQ-16** If Alex already holds 10 Booked records on sessions that have not started, then the booking service shall reject a further book request with the error "You've reached the limit of 10 upcoming classes.", where Waitlisted records do not count toward the limit.
- **REQ-17** When Alex cancels a Booked record for a session that has not started, the booking service shall set the record status to Cancelled with a late flag that is true only when the session starts less than 2 hours later.
- **REQ-18** When Alex cancels a Booked record (free or late), the booking service shall reduce the session's waitlist count by 1 and keep the booked count unchanged if the waitlist count is above 0, and otherwise reduce the booked count by 1.
- **REQ-19** When Alex leaves a waitlist for a session that has not started, the booking service shall set the Waitlisted record status to Cancelled with the late flag false, remove it from the Upcoming list, and reduce the session's waitlist count by 1.
- **REQ-22** If promoting Alex from waitlist position 1 would overlap another Booked session of Alex's, take Alex above 10 upcoming Booked sessions, or the session starts less than 15 minutes after now, then the booking service shall keep Alex Waitlisted at position 1, store and return the reason Alex was skipped, and either promote the next member by reducing the waitlist count by 1 or, when Alex is the only member waiting, reduce the booked count by 1 and re-check Alex's eligibility on the next promotion hook run.
- **REQ-23** If the promotion hook kept Alex waitlisted because of overlap, the 10-booking limit or the 15-minute window, then the Class Detail screen shall show the stored reason next to Alex's waitlist position.
- **REQ-31** When the action state for a session is requested, the booking service shall return one of Book (with spots left), Join waitlist (with the position Alex would get), Booked, Waitlisted (with position and any stored skip reason, whenever Alex holds a Waitlisted record, even if the session has free spots), or Disabled with a reason text for started, past, studio-cancelled or outside-booking-window sessions.
- **REQ-32** When a session's availability label is requested, the booking app shall return "Cancelled" for a studio-cancelled session, "Full · N on waitlist" for a full session, "1 spot left" for one free spot, "Only N left" for 2–3 free spots, and "N spots left" for 4 or more free spots.
- **REQ-41** When Alex joins a waitlist, leaves a waitlist or cancels a booking, the booking app shall show a confirmation toast without an Undo action.
- **REQ-42** If a book, cancel, join-waitlist or leave-waitlist call started from an optimistic screen update is rejected or fails, then the booking app shall restore the screen to its previous state and show an error toast with a plain-language message and no raw error text or stack trace.
- **REQ-44** When Back is used on Class Detail, the booking app shall return to the screen it was opened from (Schedule or My Bookings) with that screen's selected day, week, filters and tab kept.
- **REQ-45** The Class Detail screen shall show a hero header in the class type's accent colour with class name, type tag and intensity, plus date, start–end time, duration, room, an instructor card with avatar, name and bio, the description, a "What to bring" list with icons, an availability block with capacity bar and spots-left or waitlist count, and the text "Free cancellation until 2 hours before class."
- **REQ-46** The Class Detail action footer shall show "Book this class" with "X spots left", "Join waitlist" with "You'd be #N", "Cancel booking" in destructive style with "You're booked", "Leave waitlist" with "You're #N on the waitlist", or a disabled button with the reason text for started, past, studio-cancelled or outside-booking-window sessions, and stay pinned to the bottom of the viewport at every scroll position on viewports under 768 px.
- **REQ-47** When Alex chooses to cancel a booking from Class Detail or the My Bookings quick Cancel action, the booking app shall open a confirmation dialog before cancelling that, for a session starting in less than 2 hours, shows the warning "Late cancellation — this counts as a missed class." in warning style.

- **REQ-48** If a booking from Class Detail is rejected, then the booking app shall show the rule's message (such as the overlap message naming the conflicting class or the 10-class limit message), and also refresh the availability block and change the footer to "Join waitlist" when the rejection reason is that the session became full.
- **REQ-51** The booking app shall define its colours as design tokens with a warm off-white background, near-black text, one brand primary for primary actions, semantic success, warning, danger and muted colours, and accents Yoga sage green, Pilates dusty rose, HIIT coral/orange, Spin electric blue and Boxing deep plum used on tags, card edges and the detail hero.
- **REQ-52** Where the system colour preference is dark, the booking app shall render all three screens in a dark theme.
- **REQ-53** The booking app shall use one display font for headings and class names, one sans-serif body font, a type scale with display, h1, h2, body and caption sizes, and tabular figures for times and numbers.
- **REQ-54** While the system prefers reduced motion, the booking app shall replace card press, panel slide, capacity bar fill and toast slide animations with instant changes.
- **REQ-55** The booking app shall make every interactive element reachable and operable by keyboard alone with a visible focus indicator.
- **REQ-56** The booking app shall use semantic headings, landmarks and labels, announce the capacity bar as "N of M spots left", and pair every colour signal (type tags, status badges) with text or an icon.
- **REQ-57** While a dialog is open, the booking app shall keep keyboard focus inside the dialog and close it when Escape is pressed, returning focus to the control that opened it.
- **REQ-58** The booking app shall render all three screens without horizontal page scrolling from 360 px wide (only the day strip may scroll), show schedule cards in 2 columns from 768 px to 1023 px, and from 1024 px show Class Detail as a side panel beside the schedule within a maximum content width.
- **REQ-59** The booking app shall make every interactive target at least 44 × 44 px.
- **REQ-63** If Alex requests to cancel a record whose status is not Booked, or to leave a waitlist with a record whose status is not Waitlisted, then the booking service shall reject the request with an "invalid booking state" error and leave every booking record and session count unchanged.

Requirements

- **REQ-1** The booking app shall be a responsive web app for the single-location boutique studio Pulse Studio offering Yoga, Pilates, HIIT, Spin and Boxing classes, presenting exactly three screens, Schedule (the home screen at the root URL), Class Detail and My Bookings, for the single pre-signed-in member Alex Rivera with no sign-in screen, under a top bar that shows the "Pulse Studio" wordmark and the member avatar with initials "AR" linking to My Bookings.
- **REQ-2** The booking app shall work out "today", day boundaries and every time-based rule in the Europe/London timezone and show all times in 24-hour HH:mm format.
- **REQ-3** When the seed generator runs, the booking service shall return seed data containing at least 40 class sessions across the types Yoga, Pilates, HIIT, Spin and Boxing and the rooms Studio A, Studio B and Spin Room, 5 instructors with name, bio and avatar, at least 3 full sessions, at least 3 sessions with 1–3 spots left, at least 1 session with status "Cancelled by studio", and for demo member Alex Rivera 2 upcoming Booked bookings, 1 Waitlisted booking and 3 past Attended bookings, none of them on a studio-cancelled session.
- **REQ-17** When Alex cancels a Booked record for a session that has not started, the booking service shall set the record status to Cancelled with a late flag that is true only when the session starts less than 2 hours later.
- **REQ-18** When Alex cancels a Booked record (free or late), the booking service shall reduce the session's waitlist count by 1 and keep the booked count unchanged if the waitlist count is above 0, and otherwise reduce the booked count by 1.
- **REQ-19** When Alex leaves a waitlist for a session that has not started, the booking service shall set the Waitlisted record status to Cancelled with the late flag false, remove it from the Upcoming list, and reduce the session's waitlist count by 1.
- **REQ-26** When the end time (start plus duration) of a session with a Booked record of Alex's has passed, the booking service shall return that record with status Attended in the Past list.
- **REQ-27** If a session for which Alex holds a Booked or Waitlisted record has status "Cancelled by studio", then the booking service shall return that record in the Past list with status "Cancelled by studio".
- **REQ-28** The booking service shall return Alex's Upcoming list as Booked and Waitlisted records for sessions that have not ended, ordered by start time ascending and grouped under "Today", "Tomorrow" or a "Thu 15 Oct" style label, and the Past list as Attended and Cancelled records ordered most recent first.
- **REQ-30** When My Bookings stats are requested, the booking service shall return Upcoming as the count of upcoming Booked records, Classes this month as the count of Attended records in the current Europe/London calendar month, and Current streak as the number of consecutive Monday–Sunday weeks with at least one Attended record counting back from the current week (or from the previous week if the current week has none yet), with late cancellations changing no stat.
- **REQ-39** When Alex activates a Schedule class card outside its action button or a My Bookings row, the booking app shall open the Class Detail screen for that session.
- **REQ-41** When Alex joins a waitlist, leaves a waitlist or cancels a booking, the booking app shall show a confirmation toast without an Undo action.

- **REQ-42** If a book, cancel, join-waitlist or leave-waitlist call started from an optimistic screen update is rejected or fails, then the booking app shall restore the screen to its previous state and show an error toast with a plain-language message and no raw error text or stack trace.
- **REQ-47** When Alex chooses to cancel a booking from Class Detail or the My Bookings quick Cancel action, the booking app shall open a confirmation dialog before cancelling that, for a session starting in less than 2 hours, shows the warning "Late cancellation — this counts as a missed class." in warning style.
- **REQ-49** The My Bookings screen shall show a header with the AR avatar, "Alex Rivera" and "Unlimited Monthly", three stat tiles (Upcoming, Classes this month, Current streak (weeks)), and Upcoming and Past tabs, where Upcoming rows are grouped by day and show time, class name, type tag, instructor, room, a "Booked" or "Waitlisted #N" badge and a Cancel or Leave action, and Past rows show a status badge reading "Attended", "Cancelled", "Late cancel" or "Cancelled by studio".
- **REQ-50** While Alex has no upcoming records, no past records, or My Bookings is loading or failed to load, the My Bookings screen shall show "No upcoming classes" with a "Browse schedule" button that opens Schedule, "Your class history will appear here.", skeleton rows, or an inline error with Retry, respectively.
- **REQ-51** The booking app shall define its colours as design tokens with a warm off-white background, near-black text, one brand primary for primary actions, semantic success, warning, danger and muted colours, and accents Yoga sage green, Pilates dusty rose, HIIT coral/orange, Spin electric blue and Boxing deep plum used on tags, card edges and the detail hero.
- **REQ-52** Where the system colour preference is dark, the booking app shall render all three screens in a dark theme.
- **REQ-53** The booking app shall use one display font for headings and class names, one sans-serif body font, a type scale with display, h1, h2, body and caption sizes, and tabular figures for times and numbers.
- **REQ-54** While the system prefers reduced motion, the booking app shall replace card press, panel slide, capacity bar fill and toast slide animations with instant changes.
- **REQ-55** The booking app shall make every interactive element reachable and operable by keyboard alone with a visible focus indicator.
- **REQ-56** The booking app shall use semantic headings, landmarks and labels, announce the capacity bar as "N of M spots left", and pair every colour signal (type tags, status badges) with text or an icon.
- **REQ-57** While a dialog is open, the booking app shall keep keyboard focus inside the dialog and close it when Escape is pressed, returning focus to the control that opened it.
- **REQ-58** The booking app shall render all three screens without horizontal page scrolling from 360 px wide (only the day strip may scroll), show schedule cards in 2 columns from 768 px to 1023 px, and from 1024 px show Class Detail as a side panel beside the schedule within a maximum content width.
- **REQ-59** The booking app shall make every interactive target at least 44 × 44 px.
- **REQ-63** If Alex requests to cancel a record whose status is not Booked, or to leave a waitlist with a record whose status is not Waitlisted, then the booking service shall reject the request with an "invalid booking state" error and leave every booking record and session count unchanged.
